

I am a US citizen and Flight Attendant for United Airlines in London. I would like to say that I am totally against the proposed regulation of allowing cell phone usage onboard/inflight on aircraft. This will cause the crew major safety concerns and not to mention all the fights between passengers on night flights over phone call volume! There is no reason why ANY person should need to use a cell phone on a flight, we already have other phones available onboard. Please do not allow this to pass! You will be opening Pandora's Box!
